

## PIPELINE PREVIEWS

Pipeline Previews brings to you information on the newest drugs and medical products as they become available to the dermatologic community. This department may include additional information from the manufacturers, plus reports from physicians who wish to share their clinical experience with these new products. In addition, we will inform our readers about the latest drugs receiving Food and Drug Administration (FDA) approval.

### Introducing the WISHPro Plus

Isabella Technologies introduces the WISHPro Plus, an aesthetic device that is engineered with M.I.T. (magnetic infusion technology) to deliver active ingredients deep into the skin. Powerful magnets combined with advanced technologies deliver unparalleled results for your clients. Some key elements include: immediate visible results, non-invasive treatment, and fast ROI. The WISHPro plus is a multi-application device - smooths fine lines and wrinkles, builds collagen and elastin, boosts skin immunity, increases cell turnover, increases dermal microcirculation, enhances lymphatic drainage, reduces appearance of pigmentation, and treats the face, neck décolleté, and hands. The advanced technologies combine powerful cosmetics with multiple treatment options. The system is hygienic with single use treatment capsules and all parts of the device are washable and completely waterproof. The WISHPro plus is portable and cordless. The WISHPro Plus offers any aesthetic professional the ability to upgrade their service offering with a series of treatments that combine proven aesthetic technologies.
