RE: **Multidisciplinary Real-World Experience With Bilastine, a Second Generation Antihistamine** by Charles W. Lynde MD FR-CPC, Gordon Sussman MD FRCPC, Pierre-Luc Dion MD FRCPC, Lyn Guenther MD FRCPC, Jacques Hébert MD FRCPC, Jaggi Rao MD FRCPC, Tim Vander Leek MD FRCPC FAAAAI, and Susan Wasserman MSc FRCPC

In Multidisciplinary Real-World Experience With Bilastine, a Second Generation Antihistamine, which was published in the February issue (*J Drugs Dermatol.* 2020; 19(2):145-154. Doi 10.36849/JDD.2020.4835), Table 7 was incorrectly named. The correct Table 7 title is **Case Studies of Patients With Pruritus**.

RE: Cotofana S, Hexsel D, Avelar LET, Munia CG, Muniz M, Casabona G, Schenck TL, Green JB, Lachman N, Frank K. **Calculating the Thickness of the Superficial Fatty Layer.** *J Drugs Dermatol.* 2020; 19(1). Doi: 10.36849/JDD.2020.4619

Dear Editor,

The article “*Calculating the Thickness of the Superficial Fatty Layer*”, which appeared in the Vol. 19, No. 1, January 2020 issue of JDD, contained restatements of the methodology applied (ultrasound imaging) from previously published manuscripts by our group.^{1,2,3,4} The purpose of this article was to present formulas derived from the results of the previous articles published by our group.^{1,2,3,4} We have made the decision to remove redundant descriptions and sharpen its focus on the presentation of the mathematic formulas and by omitting Figures 1 and 2 and Table 1.

Sincerely,

Sebastian Cotofana MD PhD
